CHANGES IN COUNTRY AND EXPORT COMMODITY CLASSIFICATIONS EFFECTIVE JANUARY 1, 1962

1. CHANGES IN CLASSIFICATION OF COUNTRIES

Code	Country	Notes
<u>I. New Countries:</u>		
463	Gabon Republic	Until Jan. 1, 1962, trade with Gabon was included with French Equatorial Africa. Comparative statistics for 1961 published in 1962 reports will be adjusted to show the Gabon Republic separately.
466	Ivory Coast Republic	Until Jan. 1, 1962, trade with the Ivory Coast Republic was included with French West Africa. Comparative statistics for 1961 published in 1962 reports will be adjusted to show the Ivory Coast Republic separately.
<u>II. Changes in Codes or Country Designations:</u>		
17	Ireland (1)	Formerly code 64.
379	Syria	Formerly United Arab Republic-Syrian Region (code 386).

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of commodities used in this report are abbreviated or incomplete because of mechanical limitations. Full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.
4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of commodities used in this report are abbreviated or incomplete because of mechanical limitations. Full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of exports are based upon the declarations of exporters (export entries) as subsequently checked by customs officials, except for electrical energy where statistics are based on reports received from the National Energy Board.
2. **Valuation.** The value of goods exported is the actual amount received by the exporter in Canadian dollars, excluding such charges as freight, insurance and handling. In effect, therefore, export values are taken f.o.b. point of shipment for export.
3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units exported, while the value includes also the value of any parts of the commodity exported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of "Domestic Exports" (also known as "Exports of Canadian Produce") include both goods wholly produced in Canada and goods previously included in statistics of imports which are changed in form by further processing in Canada and then exported. Statistics of "Re-Exports" (also known as "Exports of Foreign Produce") include only goods previously included in statistics of imports which are exported from Canada in the same condition as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.
5. **Exclusions.** Export statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods shipped to Canadian armed forces or diplomats stationed outside Canada, goods financed under the Defence Appropriation Acts and shipped to Canada's N.A.T.O. allies, temporary exports for exhibition or competition, bunker supplies and ships' stores sold to foreign vessels in Canadian ports, and, from January 1, 1960, settlers' effects, private donations and gifts, and identifiable tourist purchases (see blue pages of the January-March 1960, issue of this report).
6. **Countries Credited.** Exports are credited to the country to which they are consigned at the time the goods leave Canada. The country of consignment is the country to which goods are intended to pass without interruption of transit, except in the course of transfer from one means of conveyance to another.
7. **Time Periods.** Export statistics for any month include all goods declared on export entries received at the Bureau of Statistics during the calendar month in question, or on electrical energy reports received within 12 working days of the close of the calendar month.
8. **Abbreviations.** Many descriptions of commodities used in this report are abbreviated or incomplete because of mechanical limitations. Full descriptions of all commodities appear in the new "Export Commodity Classification". The letters "N.E.S." mean "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
